**RE: COMPLIANCE EVALUATION INSPECTION N (CEI)
EAGLE VIEW FARM, SOP-09044
CLAY COUNTY, TN**

Dear Mr. Jones:

On December 9th, 2010, the Division of Water Pollution Control (WPC) conducted an inspection at Eagle View Farm. The purpose of the inspection was to determine the reliability of data submitted on the annual report, the records kept on site and to review the site conditions. This letter serves as a CEI report. The storm water drainage is ultimately to Dale Hollow Lake.

Permit, Comprehensive Nutrient Management Plan (CNMP), Records

Third party litter transfer records are complete. CNMP and soil and litter analyses are current. A copy of the permit and CNMP and all records are kept in the office on site.

Litter Storage / Handling / Disposal

The litter storage facility was less than 50% capacity and no litter was exposed to storm water. The compost bins are well kept also. The area around the litter storage, compost and bedding storage area was clean from contaminants.

Effective January 1, 2011, the Mercury Product Disposal Control Act (Senate Bill No. 2403) prohibits "covered generators" from disposing "mercury-added consumer products" as non-hazardous solid waste.

TDEC inspectors are required by the Act to make the following statement to the owner or similar authority at a facility undergoing an inspection:

"Are you aware that, if any of the following criteria apply to your business and your business utilizes mercury-added consumer products, such as fluorescent light bulbs, the Mercury Product Control Act applies to your business:

- (1) Employs ten (10) or more employees;
- (2) Owns or maintains a building of at least three thousand (3,000) square feet, excluding private residences;
- (3) Owns or maintains one (1) or more electrical distribution systems;
- (4) Engages in the demolition of buildings, excluding private residences; or
- (5) Owns or operates a tanning bed salon?

The Mercury Product Control Act requires proper recycling of mercury-added consumer products rather than disposing of such products in the solid waste stream. Do you have a plan for recycling mercury-added consumer products?"

If you have any questions, you may contact me at (931) 432-4015 or by electronic mail at jimmy.hartman@tn.gov.

Respectfully,

James E. Hartman
